Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 4-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The language used in the claims to list different species renders the claims indefinite. For example, the listing of bride chains (claim 1) and solvents in claim (4) are indefinite. It is unclear as to whether these species are used in the alternative (markush) or if they are each required. All claims should be review for this defect and clarification is required.
4. The language "of combining by" in claim 1 is indefinite. It is unclear as to how this further limits the claim.
5. It is further unclear as to how the term "combining" is intended to further limit the claims. "Combining" is generally understood to be a mixing step when forming a composition. In claim 1 it seems to imply a reaction and claim 4 recites "combining reaction". It is unclear what this is and how it further limits the claim. Clarification is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1713

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1 and 4-29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tanaka et al. US 6,071,997.

9. This patent shows three-dimensional silica particles interconnected with bonds, see the abstract and column 3 lines 60+. These bonds are seen to anticipate the claimed "bridge chains." The species of "bridge chains" are anticipated or obvious from the polymeric species that cover the surface of the silica. These polymeric groups form bonds that result in the "bridge chains" as claimed, see column 4 lines 10+.

10. The solvents as requisite claim 4 are anticipated or obvious from the disclosure at column 6 lines 58+ and the examples.

11. The limitations set forth in the dependent claims are seen to be conventional process and compositional limitations. As such, these are seen to be anticipated or obvious from this disclosure.
